

 A man with a beard and short hair is wearing Jabra Elite 85t earbuds. He is sitting in an airplane cabin, looking out the window. Other passengers are visible in the background, including a woman with long hair and a man. The lighting is soft and blue, typical of an airplane interior.
 Jabra GN

ELITE 85t

Engineered for calls and music like never before. Fully adjustable Jabra Advanced Active Noise Cancellation™ in a compact true wireless design.

Accept No Compromise

Jabra Advanced Active Noise Cancellation™ technology gives you complete control. With a dedicated ANC chip to power the fully adjustable digital ANC, dual sliders that you can adjust between full ANC, full transparency with HearThrough mode, and every possible level in between. And because it's Jabra tech, it's all crammed into a really compact design, so there's no compromise on size either.

Big sound. Small body.

The key to making a great pair of ANC true wireless buds is accepting no compromise on size. These buds tick all the boxes, with 12mm speakers, powerful bass, a customizable equalizer and AAC and SBC codecs for rich, detailed sound, in a compact design.

Talk the talk

We've put three professional-grade microphones in each of these little buds. Then we added sidetone, so you can hear your own voice more naturally on calls, along with our latest and most advanced wind protection algorithms, so your conversations will be crystal-clear.

Best buds

Get up to 5.5 hours on a single charge with ANC on, with a total charge of up to 25 hours in the compact charging case. If you use them without ANC and HearThrough, you'll get even more juice, with up to 7 hours in the buds and a total of 31 hours in the case. The case is Qi-certified, for wireless charging, and the buds are fast charging, giving you an hour of playback in just fifteen minutes.

Thousands of ears in the making

We scanned thousands of ears to develop Elite 85t. A semi-open design with pressure relief vents prevents pressure build up in the ear, while three sizes of oval silicon EarGels™ create a secure seal, boosting your music quality and keeping your ears feeling great all day.

The tough get going

We accepted no compromise engineering these little buds from strong, durable materials, so they're built to last, with IPX4-rated protection from water and a 2-year extended warranty against dust and water**.

MySound is your sound

Our pioneering technology, MySound, expertly optimizes and configures your sound via an in-app hearing test, and then calibrates it on your earbuds. The result is music that's perfectly tailored to your individual hearing profile, which you can then manually adjust using the customizable equalizer.

You're in charge

The MyControls feature in the Sound+ app lets you change your button functions. That means you can now change how you use your buttons to start and skip tracks, answer and reject calls, and more, directly from the app.

Voice assistant enabled

Elite 85t works with Siri® and Google Assistant™, so you can hit up your favorite voice assistant.

Beyond the box

Your Elite 85t buds will sound great as soon as you unbox them, but downloading the Sound+ app will make them even better, with MySound and MyControls, call settings, customizable equalizer options for personalization, and more.

HOW TO PAIR

Push the buttons on both earbuds for three seconds and then follow the voice instructions to pair to your phone.

HOW TO CHARGE

Up to 25 hours charge on-the-go
(with ANC on)
